

Florida Atlantic University Greek Alliance March 2018

After much discussion with community leaders, the Greek Alliance has decided to work with Fraternity & Sorority Life to implement changes within the FAU Greek community. This statement is in response to the initial statement sent out by the Greek Alliance in November of last year which suspended organizations from hosting events with alcohol until the Greek Alliance had time to review and install new risk management guidelines in an effort to increase the safety of the members of the four Greek councils at Florida Atlantic University.

Below is an outline of guidelines that the Greek Alliance has recommended to Fraternity & Sorority Life. These guidelines have been brought to and approved by each governing councils' member chapters:

- Organizations will be permitted to host no more than two events with alcohol per month and ALL events with alcohol must be held at Third Party Venues
 - Tailgates will NOT be considered events with alcohol, so long as they are on campus
- Organizations hosting an event with alcohol must have either the appropriate amount of Certified Sober Monitors present at the event OR hired security from a licensed and insured company present at the event
 - Individuals can attain Certified Sober Monitor status by completing the training offered by Owls Care Health Promotion
 - When utilizing Certified Sober Monitors, there must be one CSM present for every 10-12 attendees
- Beginning in Fall 2018, organizations hosting events with alcohol must have completed the Party 101 workshop offered by Owls Care Health Promotion.
 - Organizations can complete this requirement in Spring 2018
- The Greek Alliance supports and will continue to provide sponsorship for Fraternity and Sorority Life's New Member Education Series. All new members of an organization will be required to attend these new member education sessions.
- These guidelines will be revisited bi-annually in a semester basis by the Greek Alliance.
